

Highly dedicated and accomplished Senior GIS (Geographic Information System) and data strategy professional with extensive experience leading GIS initiatives and designing scalable spatial content solutions that support cross-functional business objectives. Proven ability to deliver actionable insights through dashboards, web applications, and standardized spatial content. Adept at directing cross-functional teams and aligning geospatial data systems with organizational goals, ensuring consistency, usability, and compliance across diverse operations.

Areas of Expertise

- Enterprise Geodatabase Design & Maintenance
- Python Scripting & Automation
- Data Governance & Standards
- Cartography & Map Production
- Program & Project Management
- Technical Documentation
- ArcGIS Online & Web Application Development
- Spatial Analysis & Modeling
- Data Quality Assurance & Compliance
- Remote Sensing & Imagery Analysis
- Network Analysis & Routing
- Enterprise GIS Administration
- Team Leadership & Stakeholder Collaboration
- Data Integration & Interoperability
- Systems Assessment & Modernization
- Redistricting & Demographic Analysis
- Mentorship & Technical Training
- Vendor & Contract Management

Professional Experience

Chesapeake College – Wye Mills, MD

Sept 2025 – Present

Adjunct Instructor, GIS (Continuing Education, Part-Time)

Instructs Introduction to GIS, a continuing education course within the Career and Lifelong Learning division developed for adult learners with little to no prior geospatial experience.

- Built the full curriculum around QGIS open-source software, translating complex geospatial concepts into accessible, hands-on lessons for adult learners with no prior technical background.
- Delivers hands-on instruction in QGIS, guiding students through spatial data creation, attribute management, symbology, and map production using open-source tools.
- Mentors cohorts of 5 to 10 adult students per session in applying GIS skills to real-world and career-relevant scenarios, supporting workforce development and professional advancement across the college's five-county service area.

Town of Enfield, CT | Insight Global

Sept 2025 – Present

Project Manager, GIS (Contractor)

Directs municipal GIS projects and spatial content delivery across multiple departments, including Economic Development, Fire Dept., Assessor, Public Works, and Planning. Leads the modernization of the Town's public-facing and internal web applications, parcel data infrastructure, automation pipelines, and standardized data schemas using ArcGIS Pro, ArcGIS Online, Experience Builder, and Python (ArcPy/Arcade). Administers the municipal enterprise GIS system and its integrations with external data sources, coordinating cross-departmental and external stakeholder requirements.

- Serves as technical lead for the Town's enterprise GIS modernization, assessing the existing system, documenting findings and recommendations, and guiding the upgrade across multiple departments.
- Designed and deployed enterprise web applications and dashboards across 7+ town departments, including a Fire Hydrant locator, a Memorial Day banner placement app, and a Parcel Property Viewer in Experience Builder, supported by formal change-management analysis and incident response documentation.
- Engineered Python and Arcade automation to extract and standardize popup configurations across multiple applications, eliminating several hours of manual configuration each week and improving data consistency.
- Developed a scheduled SQL script that performs a daily automated pull of the current property table from the Assessor's office, ensuring parcel attributes remain synchronized with the authoritative source of record.
- Re-engineered the Town's parcel data infrastructure into a centralized enterprise feature class governed by 33+ automated attribute rules, building a 16,000+ record parcel fabric and standardized coded value domains now relied on town-wide across 7+ departments.
- Coordinates GIS integration and data requests across internal departments and external partners, and reports monthly accomplishments to stakeholders, ensuring spatial content aligns with operational needs and town standards.

DOJ | ITC Federal – Washington, D.C.

Jun 2023 – Jun 2025

Senior GIS Analyst (Contractor)

Led spatial content development, delivery, and governance across six DOJ Civil Rights Division sections, producing hundreds of interactive applications, dashboards, and mapping products for enforcement and investigative needs.

- Geocoded address-level data and integrated parcel, zoning, and tax assessor layers using ArcGIS Pro and ArcMap to develop spatial content supporting RLUIPA investigations. Created interactive mapping content with ArcGIS Online and Web AppBuilder to visualize property use and jurisdictional boundaries. Produced district mapping content for the Voting Rights Section using Maptitude and ArcGIS Pro.

- Developed layered geospatial content using ArcGIS Pro and ArcGIS Online to geocode school locations and build interactive web apps. Integrated Census, municipal, and school district data to help the Educational Opportunities Section identify zoning-related disparities in educational access.
- Built dashboards and mapping content for Fair Housing investigations into mortgage lending and rental discrimination, visualizing HMDA, Census, land use, and rental data in ArcGIS Pro, ArcGIS Online, and Web AppBuilder to surface geographic disparities in loan approvals, investment patterns, and rental access and support evidence-based enforcement.
- Generated mapping content with ArcGIS Pro, ArcMap, and Census data to evaluate polling site accessibility. Delivered static and interactive content via ArcGIS Online to assist the Disability Rights Section in identifying geographic barriers to voting for disabled and underserved communities.
- Developed advanced spatial content, including kernel density and hot spot maps, in ArcGIS Pro and ArcMap using Census and law enforcement data. Delivered interactive tools through ArcGIS Online and Web AppBuilder to support the Special Litigation Section in analyzing segregation and enforcement disparities.

Michael Baker International – Linthicum, MD

Jan 2022 – Jun 2023

GIS Analyst

Led geospatial content remediation for statewide NextGen911 compliance across 50+ jurisdictions, standardizing workflows and producing stakeholder-ready content under strict compliance guidelines.

- Executed MSAG/ALI analysis and resolved spatial data discrepancies to ensure GIS content accuracy for emergency response systems.
- Supported a Caltrans stormwater/water runoff project, providing GIS analysis of drainage infrastructure and spatial data along transportation corridors to inform stormwater management planning.
- Designed and led the adoption of repeatable QA workflows and documentation that reduced data errors and duplicate records while speeding turnaround, governing internal content analysis procedures across multiple project teams.
- Delivered content-rich maps and reports adopted by state and local clients, enhancing transparency and supporting data-driven decision-making.
- Customized ArcGIS-based tools to streamline content validation and improve turnaround time for jurisdictional data requests.
- Achieved 100% on-time delivery for all assigned NG911 content contracts across a multi-jurisdictional footprint, contributing to improved project outcomes and internal delivery standards.

Caroline County – MD

Sept 2016 – Dec 2021

GIS and Data Coordinator

Built and managed county-wide GIS operations and infrastructure, establishing governance protocols and standardized data inputs for 10+ departments across emergency response, planning, and public works.

- Led creation of interactive dashboards and public-facing applications to deliver actionable GIS content for public safety, infrastructure planning, and grant funding.
- Centralized content storage and maintained an enterprise geodatabase with consistent metadata and schema controls.
- Oversaw GIS project lifecycles, including budgeting, vendor coordination, and contract execution; managed a multi-phase GIS infrastructure upgrade exceeding \$150,000.
- Aligned local datasets with state and regional standards to meet NextGen911 and other compliance frameworks.
- Delivered high-quality spatial content for over 10 interdepartmental initiatives, improving accessibility and reliability of geographic data across departments.

Additional Experience

Includes GIS Technician (ImageCat/Salisbury University), U.S. Army Fire Support Specialist (13F), and roles in logistics, culinary operations, and retail service. Built early strengths in spatial reasoning, operational discipline, customer service, and team leadership, which continue to inform cross-functional collaboration and technical accuracy in GIS and data content roles.

Education

Master of Science in Geospatial Information Sciences (2022), University of Maryland College Park – College Park, MD

Bachelor of Science, Biology with GIS (2016), Salisbury University (SU) – Salisbury, MD

Bachelor of Science, Marine/Environmental Science (2016), University of Maryland Eastern Shore (UMES) – Princess Anne, MD

Technical Tools & Platforms

- **GIS Software:** ArcGIS Pro, ArcGIS Online, ArcMap, ArcGIS Dashboards, Web AppBuilder, Maptitude for Redistricting, QGIS
- **Programming & Scripting:** Python (ArcPy, SciPy), SQL, ModelBuilder, automation workflows
- **Publishing & Server Tools:** ArcGIS Server Services, metadata & web content publishing, AGOL Administration
- **Office & Documentation:** Microsoft Suite (Excel, Word, PowerPoint), technical writing, workflow process design

Certifications

GISP Certification (Jan 2025)

Advanced Open Water Scuba Diving Certification (PADI, 2014)

FAA Remote Pilot Certificate Part 107 (Dec 2025)

Security Clearance

Public Trust (June 2023)

Community Involvement

Member, Rotary Club of Denton (5921), MD: 2025 – Present • URISA (GPN) Member 2025 – Present • Local Government Caucus Chair, MSGIC • Salisbury University Student Research Conference • Assateague Island National Seashore • Pemberton Nature Camp • Maryland Amphibian and Reptile Atlas (through Salisbury University)
